OBJECTIVE

A highly motivated AI Data Contributor with proven experience in data annotation and model evaluation, seeking to leverage my strong linguistic aptitude, excellent communication skills, and Information Technology background to excel as an AI Tutor. My goal is to contribute to refining generative AI models and ensuring high-quality data curation for cutting-edge AI initiatives.

PROFESSIONAL EXPERIENCE

Outlier AI - Contributor (CB) / Reviewer

Remote | January 2024 – April 2025

- Contributed as both Contributor (CB) and Reviewer, ensuring high-quality data labeling and annotation for machine learning models.
- Participated in multiple key projects at Outlier, including:
  - **RLHF (Reinforcement Learning from Human Feedback):** Provided human preference data to fine-tune AI models.
  - **Evaluation:** Conducted evaluation tasks across various AI systems to ensure accuracy, fairness, and alignment with user intent.
  - **Safety:** Focused on safety tasks by identifying harmful or biased outputs in model responses.
  - **Matcha:** Performed data annotation, quality assessment, and content review to support AI model development.
- Collaborated effectively in remote teams, meeting project deadlines and maintaining high-quality standards.

Appen - Contributor (Project Babel LLM)

Remote | April 2025 – Present

- Evaluated and refined datasets for training Large Language Models (LLMs) according to project guidelines.
- Performed tasks such as ranking AI-generated responses, assessing relevance, coherence, accuracy, and fluency.

- Contributed to improving LLM performance by providing detailed human feedback and identifying areas for model improvement.

Centific - Image Project Annotation and Curation (Client: Apple) *Remote | May 2025 — Present*

- Performed precise image annotation (including Project Amber - Image Annotation) and data curation for Apple client projects, ensuring high accuracy and adherence to strict quality standards.
- Utilized annotation tools to label, tag, or segment objects within images, ensuring high precision and consistency.
- Contributed to the development of computer vision models by providing high-quality labeled image data.

Softage Technology - Video Instruction for App Usage for AI *Remote | June 2025 — Present*

- Created and recorded detailed video instructions on app usage, serving the purpose of training and improving AI models.

SKILLS

- **AI Data Curation & Evaluation:** AI Data Labeling & Annotation , Image Annotation , LLM Evaluation , RLHF (Reinforcement Learning from Human Feedback) , Content Moderation & Evaluation.
- **Linguistic & Communication:** Proficiency in Vietnamese (Native) and English (Fluent, IELTS Certified) , Strong aptitude for language and literature (High School Award in Literature), Strong reading comprehension and writing skills , Analytical and interpersonal communication.
- **Technical & Operational:** Information Technology background, Familiarity with Annotation Tools , Attention to Detail & Quality Control , Task Prioritization & Deadline Management.
- **Tools (Nice to Have):** Experience with Python, R, SQL, Advanced Excel/Sheets (as per job description's "Nice to haves" section for Linguistics Analyst, which aligns with your IT background).

EDUCATION

IUH University, Go Vap District, Ho Chi Minh City

Bachelor of Information Technology | 2021 – 2025

- **Academic Achievement:** High School Award in Literature (during high school).

CERTIFICATIONS

- IELTS Certificate (English Proficiency)
